EQUIPMENT · LED

LED screens

Video surface wherever it is needed, fixed or transportable.

Modules of 2 x 0.7 metres that chain together to size the screen exactly as needed.

cinfo

THE CHALLENGE

Every event wants a different screen in a different place

A facility runs events on the court, in the foyer, outside and in the street. Buying a fixed screen for each spot is not viable, and hiring them every time is expensive.

01

Changing locations

Events held in different parts of the venue, or outside it altogether.

02

Sizes that never fit

A fixed screen is too big in one place and too small in the next.

03

Recurring hire

The cost of hiring screens event after event soon exceeds the cost of owning them.

WHAT WE SUPPLY

Every kind of screen, fixed or mobile, for different purposes

cinfo supplies fixed and portable screens, foldable included, so multimedia is available anywhere in the venue. Portable solutions are multi-module: they are sized by chaining as many modules as needed.

- Modules of 2 x 0.7 metres that chain together with no practical limit.
- Foldable screens for transport and fast setup between locations.
- Fixed configurations for foyers, façades, courts or public areas.
- Integration with the venue's production and content management.

HOW IT WORKS

Size it, mount it, schedule it

The modular design lets you start with a small surface and extend it once usage justifies it.

01

We define the use

Locations, viewing distance, lighting and how often it will be moved.

02

We size it

Number of modules, layout and support structure, fixed or transportable.

03

We install it

Fixed installation, or delivery of the portable system with setup training.

04

We schedule content

Content management, campaigns and live broadcast on the screen.

FEATURES

Modular surface for any need

- **Chainable modules**

  Modules of 2 x 0.7 metres joined to form whatever surface is needed.

- **Foldable screens**

  Portable solutions that fold for transport between locations.

- **Fixed or mobile**

  Permanent installation or a transportable system, depending on intended use.

- **Live content**

  Event feed, graphics, advertising and messages on air.

- **Remote management**

  Content and campaign scheduling from the administration tool.

- **Indoor and outdoor**

  Configurations adapted to the location and ambient light.

- **Extendable**

  The surface grows by adding modules, with no need to replace what is installed.

- **Compatible with the rest of the kit**

  It coexists with the scoreboard, the LED perimeter and the venue's automatic production.

BENEFITS

One investment that serves many different events

01

No recurring hire

Owned equipment pays for itself across a single season of events.

02

One system, many locations

The same kit moves to wherever each event takes place.

03

Exact sizing

The surface adapts to each occasion by adding or removing modules.

04

New advertising inventory

Every screen is one more surface for sponsors and for your own messaging.

TECHNICAL DATA

Modular configuration

Base module	2 x 0,7 metros, concatenable
Total surface	A gusto del cliente, según número de módulos
Available types	Fija, portátil y portátil plegable
Location	Interior o exterior, con la protección adecuada
Pixel pitch	Definido en proyecto según distancia de visión
Content	Vídeo en directo, grafismo, publicidad y mensajes
Control	Gestión y programación de contenidos vía web
Integration	Producción automática tiivii, videomarcador y U televisiva

Pixel pitch, brightness, weather protection and structure are defined in the preliminary study according to location and viewing distance, and stated in the technical offer.

SUPPLY

What the screen supply includes

01

Site study

Intended locations, viewing distances and lighting conditions.

02

Delivery or installation

Fixed installation, or delivery of the portable system with its structure.

03

Training

Training on setup and takedown and on content scheduling.

04

Support

Technical support and module replacement during operation.

For fixed installations, the scope of structure, civil works and connections is defined after the site study. Portable systems are delivered ready for the client's own staff to set up.

GALLERY

Installed digital surfaces

Digital surfaces in public spaces and venues.

Screens for institutional communication and campaigns.

FREQUENTLY ASKED QUESTIONS

Questions before buying a screen

Can I move it between locations?

Yes, with the portable configuration. Portable solutions are multi-module and even foldable, designed to be set up and taken down often.

How big can the screen be?

Whatever size is needed: the 2 x 0.7 metre modules chain together up to the desired surface, with no practical limit.

Can I extend it later?

Yes. Being modular, the surface grows by adding modules, with no need to replace what is installed.

Can it show the event feed?

Yes. The screens integrate with the venue's automatic production to show the directed feed, alongside graphics and advertising.

Is it suitable for outdoors?

Yes, with the brightness and protection configuration the location requires, determined in the preliminary study.

Who schedules the content?

The client's own staff, from the web management tool. Training is included at delivery.

WHO IT IS FOR

Who needs video surface

01

Sports venues

Support screens in foyers, entrances and public areas.

02

City councils

Municipal communication and information in public spaces.

03

Event organisers

Portable systems that travel with each event.

04

Retail and companies

Digital signage on façades, shop windows or indoors.
